

COVID-19 Disinfection Treatments and Training Programs April 2020

In today's world of pandemic hysteria people are frightened. Provide your residents, tenants, employees and their customers the peace of mind that your property is doing everything it can for their safety and wellbeing. We exclusively use the highest quality **hospital grade anti-microbial disinfectants**, not over the counter cleansers. Stop the spread of dangerous pathogens like COVID-19 with our programs. We offer three core disinfection programs for you to choose.

1. Daily Disinfectant Treatments:

These treatments are tailored to the needs of individual properties. Professionally treat the "high risk" surfaces regularly receiving human contact like handles, knobs, bathrooms, elevator panels, railings, mailboxes, counters, tables, chairs, benches and refuse containers. Each service will be documented with digital photographs.

2. Comprehensive One-time or Periodic Treatments:

This service is designed for properties that have a higher risk due to exposure to higher foot traffic or where a resident or worker has been exposed to the COVID-19 virus. Our trained professionals will treat vertical surfaces from seven foot tall down to the ground and all horizontal surfaces will be treated using

appropriate disinfection techniques.

3. Disinfectant Training Courses:

Alternatively, receive one hour of onsite training for a limited number of your staff. Subjects included using personal protection equipment (PPE), identifying

surfaces of concern to include onsite walk around the property, an introduction to anti-microbial agents; how to properly store and mix disinfectants, disinfection procedures and techniques with a demonstration and one gallon of anti-microbial agent, twelve microfiber towels to be used with anti-microbial solution in general areas, documentation procedures both paper and digital, Enviro Certification (to be posted in common area, website and social media platforms) and resupply services.

Call today and one of our technicians will visit your property to provide you with a complimentary estimate. In most cases, services can begin as early as the same day.
